

NOT FOR REPRODUCTION

The next generation of body contouring is here.

My body, only better...

Kristin - New Jersey

"I have always worked out and eaten a healthy diet, but I could never lose what I refer to as my 'spare tire' - that lovely fatty area on my lower abdomen and lower back. I also could never get rid of the fatty area that causes 'bra rolls'. When I started looking into having a breast reduction surgery, I saw an ad for VASER® Lipo at my doctor's office. When I asked about the procedure, I was surprised to hear from my physician that most patients see results faster with VASER Lipo than traditional liposuction.

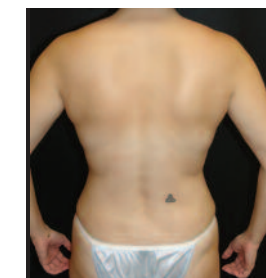

After discussing the procedure further with my doctor, I decided to have VASER Lipo on my lower abdomen and my lower and upper back. I couldn't be more thrilled with the results. I have dropped from a size 12 to a size 4! I saw results within a few days and was back to my normal exercise routine within a few weeks. I finally have the body I've worked so hard for and can actually see my abdomen muscles for the first time. I always knew they were under that spare tire, and with the help of VASER Lipo I am proud to show them off!"
